Model	Caliber Chamber	Stock	Forend	Receiver	Barrel	Magazine Capacity	Available Chokes	Accessories	Safety
RN 01	12 GA 3"/76mm Magnum	Strong and durable polymer compound synthetic butt stock	Ergonomic design forend	7075 Alloy black anodised	Black chrome finished 71 cm 4140 Steel Barrel	4+1	Full Modified Cylinder	Air Cooling Upper Rib	Manual cross button
RN 02	12 GA 3"/76mm Magnum	Ergonomic design Turkish Walnut Stock	Ergonomic design Turkish Walnut forend with checkering	7075 Alloy black anodised	Black chrome finished 71 cm 4140 Steel Barrel	4+1	Full Modified Cylinder	Air Cooling Upper Rib	Manual cross button

“ The receivers that we use are made of aluminum alloy (Ergal) material which is very light in weight but very resistant against high pressures. The black anodize plating on the receiver not only gives extra durability but also provides a life-time coating. Glossy or matt finish receivers are available. ”

STM 12 (M2)

We capstone our guns with the perfect combination of artistry and craftsmanship to the fur angles of the world. And since we are into the conviction that quality makes the difference we do place it as first priority, the raw materials along with spare parts used in the production are the cutting edge of firearms industry (4140 and 8620 hardened steel as well as 7075 aliminium) with a miticulous respect of the international norms such as Turkish Standards Institution - TSE, CIP standards and SAAMI normes.

For instance, our barrels are made of Nickel-chromium-molybdenum steel and is black chrome lined on its outer surface and white chrome lined on its inner surface for maximum durability for any kind of shotshells including steel or tungsten shot and provides maximum resistance against corrosion. The nickel-chromium-molybdenum steel barrels are standard for all our models.

Also, white chrome plated bore and chamber provides maximum durability for any kind of shot shells including steel or tungsten shot; and provides maximum corrosion resistance, besides it is easier to clean. Outside of the barrel is chrome plated again providing life-time maximum corrosion resistance. Barrels are available in matt or glossy finish.
